Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following communication is in response to Applicant's amendment filed 28 January 2005.

Status of Claims

2. Claims 1-5, 8-13, 15 are currently amended. Claim 6 is left as originally filed. Claims 7 and 14 are cancelled. Claims 16-20 are newly added. Therefore claims 1-6, 8-13 and 15-20 are currently pending in this application.

Summary of this Office Action

3. Applicant's remarks have been fully considered and are discussed in the next section below. Pending claims 1-6, 8-13, and 15-20 are rejected based on the art cited below and Applicant's request for allowance is respectfully declined.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3624

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-6, 8-13 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cobb U. S. Patent 6,199,102 in view of Ng U.S. Patent 6,640,301.

Claims 1-6, 8-13 and 15 were rejected under 35 U.S.C. 102(e) as being clearly anticipated by Cobb, U.S. Patent 6,199,102 as stated in paragraph 5 of the previous office action, mailed 29 September 2004. Regarding independent claim 1, Applicant has amended the claim to include determining whether email to a particular receiver comprises valid message authentication code (MAC) information, and filtering out at a gateway of the communication system email directed to the particular receiver that does not comprise valid MAC information. Cobb fails to teach this limitation. However Ng, teaches certifying and authenticating electronic mail in which emails comprise message authentication codes and emails are filtered out at a gateway if the code is not valid (column 6, line 41 thru column 7, line 17 and column 9, line 32 thru column 10, line 49). It would have been obvious to one of ordinary skill in the art at the

Art Unit: 3624

time of the Applicant's invention to modify the teachings of Cobb and include the teachings of Ng and have the email authenticated with codes because it provides a form of filtering based on an attribute associated with an email, so that fraudulent or unwanted emails can be screened. Both Cobb and Ng teach the ability to authenticate emails based on some attribute associated with the email.

Claims 17-20, Cobb teaches a step for determining if a particular sender is a registered sender of email to the particular receiver wherein the particular sender becomes a registered sender by satisfying a requirement (column 7 line 53 thru column 8, line 13 and Figure 7A).

Claim 10 is amended in a similar manner to that of claim 1 and follows similar reasoning. Any remaining claims are rejected based upon dependency or as stated in the previous office action, mailed 29 September 2004.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3624

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
